

## Website Hosting with Juicy Results

---

### EXTERNAL, DEDICATED SERVER

Juicy Results hosts websites on our own external, dedicated server. This is not a resale of a GoDaddy hosted service or anything like that. The physical box/drive is located in Texas and is maintained by a company called Softlayer. We pay a premium for this service and we ONLY host websites which we have built, therefore, we can assure clients that their site is not competing for bandwidth against hundreds of other sites.

### OVERVIEW ::

- Juicy Results hosts websites on our own, external, dedicated server space
- Juicy Results ONLY hosts clients whose website we either designed/developed, or for which we provide monthly marketing support
- Juicy Results' server bandwidth is wide open, since our server is not packed full of hundreds of sites competing for the same server space
- Juicy Results' server administrator is available to us 24/7. He is dependable, and is one of the original developers of CPanel, the software used to control the servers (many big-name hosting services use this same software)

### PRICING ::

Juicy Hosting is available for:

1. PAID QUARTERLY (every 3 months): **\$600/yr** or \$50/month
2. PAID YEARLY (every 12 months): **\$450/yr** or \$37/month
3. IF a client hires us for the ONGOING RESULTS relationship, or is adding a site to support the marketing plan we arm them with, they get the über-cheap **\$300/yr package**.

### FEATURES ::

Each hosted account includes:

- CPanel access, so you can manage email accounts, and adjust database settings as needed
- Up to 150 email addresses
- 99.9% Network Uptime
- FTP Access
- Apache
- Nightly Backup of Your Data
- Web based Control Panel (CPanel)
- 99.5% Server Uptime
- PHP
- SSL
- 1gb of Disk Storage
- MySQL
- SSH Access
- Unlimited Bandwidth
